PROFESSIONAL SUMMARY

Detail-oriented AI Data Evaluator and native Hindi speaker with extensive experience assessing AI-generated content, annotating visual media, and ensuring strict linguistic and cultural accuracy. Proven ability to evaluate text, video, and image datasets to help train and internationalize frontier AI models. Highly self-directed recent Computer Science graduate (2025) who thrives in fast-paced environments. Passionate about leveraging strong bilingual proficiency (Hindi and English) and technical adaptability to shape high-quality, culturally appropriate AI experiences for localized markets.

CORE COMPETENCIES & SKILLS

- **Languages:** Native Hindi, Fluent English (Fluid written and spoken translation/QA).
- **AI Quality Evaluation:** Linguistic Accuracy, Cultural Appropriateness Assessment, Hallucination Detection, AI-Generated Content Review.
- **Data Labelling & Annotation:** Video, Image, and Graphic Annotation, Action Atomicity, Boundary Timing, High-Volume Output Targets.
- **Operational Excellence:** Fast-paced Adaptation to Labelling Guidelines, Self-Directed Time Management, Cross-Functional Alignment, Dataset Creation.

PROFESSIONAL EXPERIENCE

AI Quality Evaluator & Data Annotator (Contract)

Jan 2024 – Present

Outlier AI, TryRating, TELUS Digital — Remote

- **AI Content Evaluation:** Evaluated and rated AI-generated content for linguistic quality, factual accuracy, and cultural appropriateness, ensuring outputs meet high-quality bars for end users in specific locales (Project Aether, Mech Circuit).
- **Visual Data Labelling:** Annotated and labelled dynamic visual assets (including 8-second video clips for robotic imitation pipelines), verifying timing boundaries, interaction verbs, and asset classification with pixel-perfect attention to detail.
- **Guideline Adherence & Output Targets:** Quickly adapted to evolving, complex labelling guidelines across different task types, consistently delivering labelled assets on time and meeting strict weekly output targets.
- **Quality Iteration:** Reviewed and refined personal labels based on detailed QA feedback to maintain absolute accuracy and consistency across large dataset batches.
- **Dataset Contribution:** Supported the creation of high-quality, localized training datasets by identifying edge cases, cultural nuances, and grammatical inconsistencies in machine-generated outputs.

Independent Technical Researcher & Developer

Jan 2024 – Present

Project: Personal-Branding-Engine

- **Dataset Management:** Designed and deployed backend data architectures (Supabase/SQL) to efficiently organize, store, and manage application data and asset libraries.
- **Technical Adaptability:** Self-directed the integration of multiple complex frameworks (Docker, Render, GitHub), demonstrating the ability to independently manage concurrent workflows and learn new operational systems quickly.
- **Attention to Detail:** Maintained precise, error-free code and technical documentation, mirroring the strict consistency required in high-volume data annotation.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Graduated: April 2025

GIET University

- **Focus Areas:** Data Structures, Computational Logic, Advanced Analytics, and Technical Writing.

- **Hackathon Competitor:** Demonstrated ability to thrive in fast-paced, high-pressure environments by competing in the Bharatiya Antariksh Hackathon (2025) and Innova Hack (2026).
- **Technical Rigor:** Passed stringent logical and algorithmic evaluation assessments on CodeSignal and Handshake AI.
