PROFESSIONAL SUMMARY

Versatile Software Engineer and AI Data Specialist bridging the gap between backend infrastructure, business intelligence, and frontier AI evaluation. Experienced in building robust data pipelines, generating actionable analytics, and rigorously testing large language models. Highly adaptable technical generalist accustomed to solving complex, ambiguous challenges in fast-paced development environments.

TECHNICAL STACK & COMPETENCIES

- **Software Engineering:** Python, PostgreSQL, SQL, REST APIs, Frontend & Backend Troubleshooting, Git/GitHub.
- **Data & Business Intelligence:** Data Warehousing, ETL Workflows, Tableau, Power BI, Advanced Excel.
- **AI & Evaluation:** RAG Pipelines, GenAI (LangChain), Prompt Engineering, LLM Benchmarking, Multimodal QA.

PROFESSIONAL EXPERIENCE

AI Data Specialist & Technical Evaluator

Jan 2024 – Present

Outlier / Freelance AI Labs

- Evaluate and debug complex AI-generated code and text outputs to ensure logical accuracy, structural integrity, and systemic grounding.
- Assess the functionality of backend logic, frontend code snippets, and database queries generated by frontier models using strict technical rubrics.
- Document highly structured rationales for evaluation decisions to directly improve downstream machine learning training pipelines.

Software Engineering & Data Contributor

Jan 2023 – Present

Project Lotus

- Build and optimize Python and PostgreSQL pipelines for automated data extraction, transformation, and complex ETL workflows.
- Implement automated quality checks to ensure data integrity and structural consistency for robust data warehousing initiatives.
- Support cross-functional technical teams by generating clean, reliable data streams utilized in business reporting and generative AI applications.

Search Relevance & Localization Analyst

Jan 2023 – Jan 2024

TryRating

- Executed precise linguistic and content analysis on search queries to evaluate semantic meaning, search intent, and user experience (UX) outcomes.
- Maintained strict adherence to detailed algorithmic evaluation rubrics to ensure high-quality, localized AI outputs for consumer-facing products.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science

Graduated: Apr 2025

GIET University
